Responsible Packaging

Trinity has made a commitment to responsible packaging and is able to confirm to both requirements in the 2019 ANSI/BIFMA Furniture Sustainability Standard even though only one is required.

For all tier 1 suppliers packaging is made from readily recyclable material. Materials are also taken in and used in a reusable packaging system.

Inbound packaging materials are reused either by modifying inbound boxes or pallets to fit our needs. Or by baling cardboard in our in-house bailing machine to be recycled.

Outbound packaging consists of either heat shrinking items to recycled cardboard cartons, trays, & pads or by pressure packing furniture into recycled cardboard boxes.

Please also see additional attached letter from our packaging supplier supporting that our outbound cardboard is within requirement of the recycled materials content percentages in the 2019 Furniture Sustainability Standard.
